

Teacher Feedback on Syllabus

Most of the teachers have the opinion that the syllabus adequately represents the curriculum design. As some of them are the members of Bos, faculty and academic council, they have a voice in deciding their own syllabus. ICT facilities are used by teachers and the students and they are more interested in those classes. Some of the teachers are of the opinion that syllabus is heavy and so there is no room for the students and teachers to go out of the syllabus. Most of the teachers design special strategies like remedial classes and bridge courses for advanced learners and slow learners respectively. Majority of the teachers undertake revision/ question paper discussion and conduct examinations in time. In a nutshell the syllabus is good as it caters to the need of the academic sector.
