Extension Programme Report 2016-17

Extension activities in the neighbourhood community in terms of impact and sensitising students to social issues and holistic development.

1. Thalir Jaiva Gramam Digitalization

A novel activity organized by the department during the academic year 2016-17 was an extension programme arranged in the First Ward of Koyilandy Municipality, that is “Thalir Jaiva Gramam” Mandamangalam in January. As a part of digitalizing this village, our students created e-mail id for all the adults here. This gave them an opportunity to mingle with the society and understand various aspects of our social life styles.

On 26 January, our students visited this village to take pictures (Photos) of the saplings of trees planted by the people as a part of promoting greenery.

This was a venture taken up by the people as a part of participating in a competition introduced by GCEM (Green Clean Earth Movement) foundation.

Our students uploaded the photos of the saplings in the ‘greencleanearth.org’ website for the ‘Harithapuraskaram’ award.
